Summary

Digital Transformation Project Manager | Technical Program Management | Software Delivery Manager with 10+ years across engineering and software delivery, including 3+ years leading Agile digital transformation. Scaled a digital transformation team's delivery capacity by 10x — from ~2 to 20–28 projects/year — delivering 65 projects end to end for 22 departments and 1,600+ employees while reporting directly to the COO. Engineering foundation (instrumentation & control, QA/QC) combined with software delivery leadership: Scrum-Agile methodologies, delivery governance (support tiering, SLA frameworks, intake and prioritization standards), portfolio management, vendor management, and AI-enabled process automation across enterprise ERP/HRIS implementations.

Experience

Oak Drive Ventures Inc. | BGC, Taguig

Digital Transformation Project Manager | 07/2023 - Present

- **Scaled the Digital Transformation team's delivery capacity by over 10x** (from ~2 to 20–28 projects/year), delivering **65 projects end-to-end — from requirements to go-live — over 3 years**.
- **Led a cross-functional team of 6 developers, 1 QA, and 1 designer** serving 22 departments; reported directly to the COO and presented sprint and portfolio updates to the C-suite and department heads.
- Led the transition from traditional project execution to Agile delivery (Scrum) — running sprint planning, backlog refinement, and retrospectives — improving planning, collaboration, and delivery predictability.
- Led a phased **Odoo ERP implementation** across multiple corporate entities — 7 modules live in production (accounting, employee records, recruitment, helpdesk, agreements, performance management, and the shared core), with payroll in active delivery.
- Delivered payroll implementation for **1,600+ employees** — pay rules, statutory contributions, data migration, parallel runs, UAT, cutover, and post-launch support.
- Designed the team's delivery governance — application support tiering, SLA framework, intake and prioritization standards, and an executive reporting cadence for the C-suite.
- **Reduced developer context switching** by centralizing intake from 22 stakeholder departments (1,600+ employees) through an AI-powered ticketing system.
- **Created executive dashboards** in Coda, Gamma, Linear and a custom app for real-time roadmap, velocity, and sprint visibility.
- **Improved stakeholder communication** through transparent project tracking, sprint updates, and an AI-powered support channel.
- Designed **wireframes and user flows** using Figma, bridging business requirements and technical implementation to reduce development rework.
- **Translated business requirements into technical solutions** by working closely with stakeholders and developers to deliver user-centered applications.
- **Optimized delivery processes** through risk identification, bottleneck analysis, and continuous process improvement.
- **Documented multiple projects** using Coda (user stories and guides), Figma (process flow diagrams) and Gamma (presentations).
- **Built workflows and automation** that streamlined project intake, ticket creation, request routing, and backlog administration.
- **Managed delivery of enterprise applications** — HRIS platforms, ERP modules, collection automation tools, and internal business systems — **owning vendor management, UAT, change management, and go-live coordination with 3 external vendors** (Heliconia, Jeonsoft, Pinfront).
- **Managed a technology portfolio of 5–11 concurrent initiatives** across HR, finance, lending, and operations while maintaining predictable delivery schedules.

TaskUs - SuperBam | Remote (New Braunfels, TX)

Content Moderator | 02/2021 - 06/2023

Supported content protection operations for digital platforms — copyright claim workflows, policy compliance, and quality standards in a high-volume global environment.

EISSS | Pasig, Manila

Project Engineer | 10/2017 - 01/2021

Assessed complex engineering systems across plants and factories and produced clear CAD drawings for effective communication with clients and contractors. Served as the bridge between clients, contractors, and internal engineering, applying analytical problem-solving and attention to detail to identify issues and deliver practical engineering solutions.

SJ E&I INC | Pagbilao, Quezon
QA/QC Engineer | 02/2016 - 09/2017

Conducted Pre-Loop and Final Loop inspections for DCS systems, ensuring compliance with safety and quality standards. Identified issues early through detailed troubleshooting, reducing rework and supporting successful project delivery.

Skills

Agile Methodologies (Scrum) • Project Management • Portfolio Management • Program Governance • Executive Reporting • Vendor Management • Change Management • Risk & Dependency Management • Digital Transformation • Software Development Lifecycle (SDLC) • Jira / Linear / Coda Project Management • Stakeholder Management • Requirements Analysis • Business Process Improvement • AI-enabled Process Automation & Delivery Optimization • AI Fluency • AI-Powered Development • Cross-Functional Team Leadership

Education

Zuitt Coding Bootcamp | Quezon City, Manila
Full Stack Web Development | 06/2023
Enthusiastic Learner Award

Philippine Instrumentation and Control Society | Mandaluyong, Manila
Instrumentation and Control | 11/2018
8th out of 1057 examinees in Engineering Certification Exam
11th out of 2089 examinees in Technician Certification Exam

Batangas State University | Batangas City
Bachelor Of Science Instrumentation and Control Engineering | 01/2017
